## Hawkeye II by Persistent Surveillance Systems

Persistent Surveillance System's president Ross McNutt was tasked with discovering a way to prevent roadside IED's in IRAQ whilst in the USAF. His solution was to attach amazingly high resolution cameras to aerial vehicles and take a picture every few seconds. When an IED detonated, it was possible to view a picture of the explosion; and then scroll back through the archived photos to the time when the bomb was planted. By scrolling back in time through surveillance photos, US troops followed suspects back to their homes from the bomb site, conducted raids, and arrested occupants.

Upon returning to civilian life, McNutt marketed this system to law enforcement for use in "the resolution of criminal acts." Several U.S. cities have now been under the watchful eye of PSS, Inc.'s all observant system, including Philadelphia, Dayton, and Baltimore.

### What's this about?

Surveillance Drone Action Figures are fully customizable 3D models of surveillance vehicles currently in service across the continental United States. The aim is to promote awareness of, and dialogue about, emerging surveillance techniques.

### Participate.

Participants are encouraged to design or customize their drones with personal reactions, inserting opinions and stories into the models. The customized action figures will feature in a surveillance based art exhibit at the University City Science Center's Esther Klein Gallery in Philadelphia.

### Used at these known locations.

### Hawkeye II

by Persistent Surveillance Systems

WEIGHT: 137 lbs / 62 kg

POWER CONSUMPTION: 800-1200 Watts

NUMBER OF CAMERAS: 12

TOTAL RESOLUTION: 192 Mega-pixels

VEHICLE PLATFORMS: Cirrus SR20 (Pictured)

OPERATING SYSTEM: Windows 7 +

TEMP. RANGE FOR OPERATION: 32 F. to 95 F.

ABOVE: EARLY HAWKEYE 1 FOOTAGE OF AN AREA NORTH OF TEMPLE UNIV. CAMPUS (GLENNWOOD AVE & BROAD)
