## MQ-9 Reaper by Global Atomics

If the Silhouette of the MQ-9 'Reaper' looks familiar, it's because it's iconic. 'Reaper' is simply the name given to unarmed versions of the 'Predator' unmanned aerial vehicle. The very same ones used to carry out global strikes in the war on terror. Reapers carry a payload of equipment being used for 'situational awareness' and surveillance. This might include fake cellphone towers called DirtBoxes, facial recognition technology, thermal cameras, and very high megapixel cameras. MQ-9's are being flown over United States soil, at the request of local police, while still being assets owned and maintained by the U.S. Military. Evidence collected by Reapers has lead to the arrest of citizens in several border states. This pattern of Drones-on-Loan is a legal grey area as the Posse-Comitatus Act of 1878 prohibits certain branches of the U.S. Military from acting in the role of civilian policing.

### What's this about?

Surveillance Drone Action Figures are fully customizable 3D models of surveillance vehicles currently in service across the continental United States. The aim is to promote awareness of, and dialogue about, emerging surveillance techniques.

### Participate.

Participants are encouraged to design or customize their drones with personal reactions, inserting opinions and stories into the models. The customized action figures will feature in a surveillance based art exhibit at the University City Science Center's Esther Klein Gallery in Philadelphia.

### In use at these locations.

### MQ-9 REAPER

by Global Atomics

WEIGHT: 6,782 lbs

HEIGHT: 12' - 6"

LENGTH: 36'-0"

RANGE: 1,500 mi

CRUISE SPEED: 200 mph

MAX OPERATING ALTITUDE: 50,000 ft

PAYLOAD WITH FUEL: 3,750 lbs

ABOVE: CLOSE-UP OF THE CAMERA, SURVEILLANCE ARRAY, AND 'TARGETING POD' OF AN MQ-9.
