## PC-12 NG 'Specter' by Pilatus

Why would a Swiss maker of small aircraft known primarily for small-business-travel "prop" planes modify one of its most popular models for surveillance work? Even going so far as nicknaming it the 'Specter'? According to Pilatus, the new iteration of the PC-12 was developed due to great demand for "the possibility of a surveillance-type platform" by local U.S. law enforcement backed by politicians who felt Washington wasn't spending enough on border security. The Texas Department of Public Safety recently spent \$7.4 million to purchase a PC-12 'Specter', part of \$600 million in state tax money allocated for securing the Mexican border. The Phoenix Police Department also purchased a 'Specter' this decade, for purposes of monitoring protests, covert surveillance, and ultra-long range imaging. While a large debate about unmanned drones over U.S. soil seems to take center stage, the politics and economics of local municipalities occasionally forces the issue into human piloted craft.

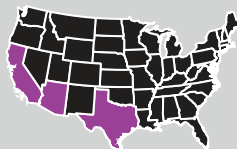

### What's this about?

Surveillance Drone Action Figures are fully customizable 3D models of surveillance vehicles currently in service across the continental United States. The aim is to promote awareness of, and dialogue about, emerging surveillance techniques.

### Participate.

Participants are encouraged to design or customize their drones with personal reactions, inserting opinions and stories into the models. The customized action figures will feature in a surveillance based art exhibit at the University City Science Center's Esther Klein Gallery in Philadelphia.

### In use at these locations.

## PC-12 NG 'SPECTER'

by Pilatus

WEIGHT: 6,782 lbs

HEIGHT: 14' - 0"

LENGTH: 47' - 0"

RANGE: 2,123 mi

CRUISE SPEED: 160 mph

MAX OPERATING ALTITUDE: 30,000 ft

PC-12 BASE PURCHASE PRICE: \$3.85 million
